User Documentation

Selecting PDF File

Clicking the **Add PDF Document** icon , or selecting **File** then choosing **Add PDF Document** will open the standard file browse and select window. From that window you can navigate to the folder and find the files you want to add to the list of files to be watermarked.

Alternatively, if you are using Windows Explorer to locate files, you have the convenience of

being able to 'drag and drop' files into the document window.

A-PDF Number Pro even allows you to select all files in a particular directory/folder by using the **Add a Directory**  option from the **File** menu! Add a directory also supports sub-folders.

Each added file is displayed in the PDF File List window, as seen in the example below. You can view any of the files in the window by 'double-clicking' them. That will open PDF files in your default PDF reader program (usually Adobe Reader).

Set Bate Number Option

You can customize your page numbers anywhere on the page, specify the style of page numbers, define the font name, size, color etc. Special features include setting prefix and suffix for page number, setting page range for processing, defining start and stop page counts for page groups, reversing page numbering, labeling, and stamping custom text, alignment, custom position, opacity, rotation, symmetry page etc.
