Selecting Files

Clicking the **Add** icon ^{See} then will open the standard file browse and select window. From that window you can navigate to the folder and find the HTML files you want to add to the list of files to be worked.

Alternatively, if you are using Windows Explorer to locate files, you have the convenience of being able to 'drag and drop' files into the document window.

Clicking the **Add** icon 🔛 hen will open the new window. From that window you can add Web URL to the document list of files, For example :http://www.a-pdf.com/

Add	
Add Url	
Add Eolder	
<u>R</u> emove	

🚰 Add Url	for Html to PDF	×
?	Please Input a Internet address (URL) into follow combox for convert ! Example: http://www.a-pdf.com	
Open:	http://www.a-pdf.com/	
	<u> </u>	

A-PDF Html to PDF even allows you to select all html files in a particular

directory/folder by using the **Add Folder** ¹ button! Adding a directory also supports sub-folders.

Each added file is displayed in the document list window. You can view any of the files in the window by 'double-clicking' them. That will open Html files in your inetrnet explorer program.

Docs by clicking the **Clear** icon **X**

You can click the **Remove** icon \bigotimes to remove selected files in list or you can clear all

Convert to PDF And Save As

Click the Convert to PDF And Save as icon to convert all of Web Pages in the document windows to PDF and save the resultant file to a

Output Settings

A-PDF HTML to PDF allows you to undertake a number of special actions to apply to

your output document. Click the

icon.

This brings up a multi-tab list with options for accessing and changing your PDF document. You can edit the Properties, adjust Security settings (passwords,view/print permissions, etc.)in the document, Add Page Numbering to the Output document with complete control over where and how page numbering is displayed, as well as change the Output file's "view" layout.

Option – Properties

The Properties changer allows you to add/edit Title, Subject, Author, and Keywords for the Output PDF document.

Option	
Properties Se	curity Watermark Viewer Page Number
<u>T</u> itle:	title
Subject	subject
<u>A</u> uthor	chj
<u>K</u> eywords	cs
	Ok Cancel

Option - Security

The Security options are self-guided and intuitively obvious making them very simple to use. In each case, check the uppermost checkbox to 'activate' the alternative selections on either tab.

Option	×
Properties Security Watermark Viewer Page Number	_

Require a password to open the document	
Document open password: 123	
Permissions Use a password to restrict permissions	
Permissiongs Password: 123	
Print Allowed:	
Changes Allowed: Filling in form fields and signing existing signature f	
✓ Enable copying of content	
Ok Cancel	

Option - Page-Numbering

The page-numbering feature allows you to select how page numbering is added to output documents. Check the 'Add page number to output file' box, and you can make selections simply for your output document.

Option		×
Properties Securi	ty Watermark Viewer	Page Number
Add page nu	mber to output file	Preview:
Page end	1 999999

The watermarks for applying to PDF(s) are listed in the Watermark list, where you can find text and image Watermark items list in here, You can apply watermark by marking one or multiple Watermark items checked, The watermark items which checked will to be applied to Output PDF(s)

Watermark Name	Туре
A Text - FINAL	Text Checked watermark

Copyright © 2009 A-PDF.com - all rights reserved

Create Text Watermark

In Watermark list window, Click the icon A to open the **New Text Watermark** configuration window. You can configure the text watermark properties here. Once you set the desired options for the text watermark, you can click **OK** to save it, Options that you can set:

Name - you can enter a name for the watermark (note this is not the text that will appear in the pdf, it's used only in the list of available watermarks that you see on the Watermarks list and must be a unique name).

Text - the text you enter here is actually the text that will appear as the PDF watermark. You can use macro to specify dynamic text, either select from the Macro list

🕹 Edit	t Text Watermark

Inches	s 🗸 🗸	

or input directly. As you type you will see in the Preview section how the watermark looks.

Text properties - You can select the type of the font (in the Font section), color, style (bold, italic, underline) and size of the text. If the font is true type, you have choice to embed the font or not.

Text Layout - If the Fit to margins options is selected the size of the font will be automatically adjusted to fit in the limits of the page margins. If the **As background** option is not checked, the text watermark will be placed on top of the content that currently exists in the document, otherwise it will be placed under the existing content. You can place the text to a fix position or tile in pages by check or uncheck **Tile style** option. **Offx** means x-offset, **Offy** means y-offset. **Position** and **Margin** helps you to adjust the position of text watermark. The margin can use either inch/millimeter or percent as unit.

Text Effect – you can choose a rotation angle if you want the text to be rotated (Rotation, values accepted between 0 and 360) and set an Opacity value so that the text is transparence (values from 0 to 100). 0 means invisible, 100 means visible solid.

Preview - in this section you will be able to see how the text watermark will be displayed in the PDF file.

Now the text watermark has been defined and saved, it will be shown in the **Watermarks list window.**

Create Image Watermark

In Watermark list window, click the icon 🚔 to open the **New Image Watermark** configuration window. In here you can configure the image watermark properties.

Once you set the desired options for the image watermark, you can click **OK** to save it, Options that you can set:

Name - you can enter a name for the image watermark.

Image - You can browse and choose an image that will be used as the watermark. Image formats that can be recognized: .BMP, .GIF, .I CO, .JPG, .TIF, .JPEG, .JP E, .PBM, .PCX, .PNG, .PP M, .PSD, .TGA, .TGA etc. After you click ok you will see it in the Preview section.

Edit Image Watermark - (Image - LOGO (backgro	und))
😓 Edit Image Watermark

	OK Cancel

Image properties and margins - by default the **Fit to margin** are checked. The **Fit to margins** option will adjust automatically the image to fit in the limits of the page margins. If you uncheck the **Fit to margins** option you can enter custom dimensions for your image (units for the dimensions are those selected in the Units drop-down includes inches, millimeters or points) and the image will be automatically adjusted as seen in the Preview section. The **Stretch to margins** option will adjust automatically the image to stretch in the limits of the page margins

Image Effect - Using options in this section you can choose a rotation angle if you want the image to be rotated (Rotation, values accepted between 0 and 360) or set an Opacity value so that the image is not fully visible (values from 0 to 100).

Preview - in this section you will be able to see how the image watermark will be displayed in the PDF file.

Now the image watermark has been defined and saved. It will be shown in the **Watermarks list window.**

Option - Viewer

The Viewer option allows you to set various parameters as the defaults to be used when your output pdf is viewed. Use the dropdowns to set the document options, and the checkboxes to choose window and interface options to completely customize how your output document first appears when opened.
