Selecting Files

Clicking the **Add** icon the null open the standard file browse and select window. From that window you can navigate to the folder and find the files you want to add to the list of files to be worked.

Alternatively, if you are using Windows Explorer to locate files, you have the convenience of being able to 'drag and drop' files into the document window.

A-PDF Office to PDF even allows you to select all files in a particular

directory/folder by using the **Add <u>F</u>older** ¹ button! Adding a directory also supports sub-folders.

Each added file is displayed in the document list window. You can

Add Eolder

Released: February 2009

Page 9 of 19

User Documentation

view any of the files in the window by 'double-clicking' them. That will open DOC files in your MS Office program.

You can click the **<u>Remove</u>** icon \bigotimes to remove selected files in list or you can clear all Docs by clicking the **Clear** icon

Convert to PDF And Save As

Click the **Convert to PDF And Save as** icon to convert all of Microsoft Office documents in the document windows to PDF and save the resultant file to a directory which you selected.

Hot Directories Mode

You may want to monitor a directory in a server, when some one copying the Office files in, the files will be converted to PDF and sent to an output directory automatically.

In A-PDF Office to PDF wizard window, select the option **Hot Directories Mode** and push the button **Next** >, a Hot Directories Service window will be opened.

Create Text Watermark

In Watermark list window, Click the icon A to open the **New Text Watermark** configuration window. You can configure the text watermark properties here. Once you set the desired options for the text watermark, you can click OK to save it,

🥙 Edit Text Watermark - (Text - NOT APPROVED)

Edit Text Watermark

Options that you can set:

Name - you can enter a name for the watermark (note this is not the text that will appear in the pdf, it's used only in the list of available watermarks that you see on the Watermarks list and must be a unique name).

Text - the text you enter here is actually the text that will appear as the PDF watermark You can use macro to specify dynamic text, either select from the Macro list

	NOT APPROVED Macro:	
Text Pre		
Eont:	Helvetica Embeded Font	
<u>S</u> ize:	15 Color:	
Style:	Bold Italic Underline	
Text Lay	vout	
Layo <u>u</u> t:	Fix As background	NOT APPROVED
Til <u>e</u> S	Style Off <u>x</u> : 0.07	NOT APPROVED
Text Effe	y: 0% 100%	
Rotation		

or input directly. As you type you will see in the Preview section how the watermark looks.

Text properties - You can select the type of the font (in the Font section), color, style (bold, italic, underline) and size of the text. If the font is true type, you have choice to embed the font or not.

Text Layout - If the Fit to margins options is selected the size of the font will be automatically adjusted to fit in the limits of the page margins. If the **As background** option is not checked, the text watermark will be placed on top of the content that currently exists in the document, otherwise it will be placed under the existing content. You can place the text to a fix position or tile in pages by check or uncheck Tile style

option. **Offx** means x-offset, **Offy** means y-offset. **Position** and **Margin** helps you to adjust the position of text watermark. The margin can use either inch/millimeter or percent as unit.

Text Effect – you can choose a rotation angle if you want the text to be rotated (Rotation, values accepted between 0 and 360) and set an Opacity value so that the text is transparence (values from 0 to 100). 0 means invisible, 100 means visible solid.

Preview - in this section you will be able to see how the text watermark will be displayed in the PDF file.

Now the text watermark has been defined and saved, it will be shown in the **Watermarks list window.**

Create Image Watermark

In Watermark list window, click the icon 🚔 to open the **New Image Watermark** configuration window. In here you can configure the image watermark properties.

Once you set the desired options for the image watermark, you can click *O*K to save it, Options that you can set:

Name - you can enter a name for the image watermark.

Image - You can browse and choose an image that will be used as the watermark. Image formats that can be recognized: .BMP, .GIF, .I CO, .JPG, .TIF, .JPEG, .JP E, .PBM, .PCX, .PNG, .PP M, .PSD, .TGA, .TGA etc. After you click ok you will see it in the Preview section.

Edit Image Watermark - (Image - LOGO (backgr	ound))
	Contraction of the second seco
Rotation: 0 gegree As background Position in margins Use % Left: 0 Bight: 0 Metric units Inches	A-PDF Watermark

Image properties and margins - by default the **Fit to margin** are checked. The **Fit to margins** option will adjust automatically the image to fit in the limits of the page margins. If you uncheck the **Fit to margins** option you can enter custom dimensions

Released: February 2009

for your image (units for the dimensions are those selected in the Units drop-down includes inches, millimeters or points) and the image will be automatically adjusted as seen in the Preview section. The **Stretch to margins** option will adjust automatically the image to stretch in the limits of the page margins

Image Effect - Using options in this section you can choose a rotation angle if you want the image to be rotated (Rotation, values accepted between 0 and 360) or set an Opacity value so that the image is not fully visible (values from 0 to 100).

Preview - in this section you will be able to see how the image watermark will be displayed in the PDF file.

Now the image watermark has been defined and saved. It will be shown in the **Watermarks list window.**

Option - Viewer

The Viewer option allows you to set various parameters as the defaults to be used when your output pdf is viewed. Use the dropdowns to set the document options, and the checkboxes to choose window and interface options to completely customize how your output document first appears when opened.
